

Configuration Management Tool

The screenshot shows the Teleste Configuration Tool interface. The window title is "Teleste Configuration Tool". The menu bar includes "File", "Edit", and "Help". The main area displays a table with the following columns: "Package version", "#XXXXXX", "Last saved", "date", "DeviceMountings", "Configuration version", and "[object Object]". The table is currently filtered to show "DeviceMountings". The table has a header row with columns "Name", "Min-Max", and "value". The table contains 15 rows, each with a "description" in the "Name" column, "DEFAULT" in the "Min-Max" column, and a status indicator (a green or red dot) in the "value" column. The status indicators for the 15 rows are: green, red, red, green, red, red, green, green, green, green, red, green, green, green, green. At the bottom left of the table, there is a button labeled "Add module...".
